

REVITALIZE
ENERGY

Environmental Coordinator

Revitalize Energy Inc. is a rapidly growing junior oil and gas producer, leading the way to sustainable production using biobased chemistry, while balancing an asset portfolio. With assets across both Alberta and Saskatchewan in the Lloydminster region, Revitalize is currently seeking a full time Intermediate Environmental Coordinator based out of Calgary or Lloydminster. The position will report to the Manager, Environment and Asset Retirement. The Environmental Coordinator will be key in championing a portfolio of wells in Alberta and Saskatchewan through the various stages of the decommissioning, remediation, and reclamation process. Other responsibilities will include, but not limited to, tasks and initiatives related to spill response, risk assessments, carbon emissions data tracking, vendor compliance, ground disturbance reviews, safety initiatives, data management, analysis and reporting.

Required Competencies:

- Detail orientated and organized.
- Posses strong verbal and written communication skills and interpersonal skills.
- Accountable to all assigned duties.
- Proactive approach to problem solving and works collaboratively.
- Is nimble and adaptable.

Qualifications:

- Degree or technical diploma in an environmental discipline.
- Desirable: affiliation with a professional association (P.Ag., R.Tag., EP, etc.).
- 5-7 years experience working in the environmental sector in the upstream oil and gas industry. Must include experience working with environmental sites assessments, remediation, and reclamation.
- A solid understanding of upstream oil and gas regulatory requirements including Reclamation Criteria for Wellsite's and Associated Facilities, Alberta Tier 1 and 2 guidelines, CCME Guidelines, PNG 016, PNG 018 and PNG 033.
- Must have an understanding of MS suite.
- Technical and Grant writing, reporting experience.
- Vendor and Safety compliance experience.
- PMP certification or equivalent – managing projects from concept through to closure.
- Experience with Petroninja, P2 (Qbyte, CSLand), PowerBI/Excel, SharePoint an asset.
- Safety and ground disturbance tickets an asset.
- Valid drivers license and commitment to safety.

Key Responsibilities:

- Ensure timely progression of wellsite's and facilities through environmental site assessments, remediation, reclamation, and reclamation applications.

- Manage environmental sites assessment reports and related information, ensuring wellfile's are current.
- Must ensure Asset Retirement databases are kept current daily to ensure real time statuses for reporting purposes.
- Review and upkeep of Complyworks.
- Prompt reporting of regulatory submissions for both AB and SK.
- Support field operations with tracking and reporting of material transfers related to equipment decommissioning and abandonment reports.
- Drive continuous improvement with the company's processes and procedures.
- Compilation of ground disturbance packages for field supervisors.
- Support field operations with safety requirements.
- Continuous education of technologies and innovations that will enhance the corporations' efficiencies and overall value.
- Support the development and implementation of Carbon Emissions program.
- Maintain cost control and support budget planning, AFE requestions, etc.
- Manage Regulatory Inspections.

Revitalize recognizes and values the personnel required to drive the success of the organization and takes pride in a team orientated culture, nurturing work life balance. If working in an energetic, creative and engaged team setting interests you, please send your resume to careers@reenergyinc.com and reference in the email subject: Environmental Coordinator Position.

This posting will remain open until a suitable candidate has been selected.
